

aviation second to none.

Laszlo's Friends at Work.

MR. JEROME K. JEROME, I believe, is the person who has been active in getting a petition signed by leading artists and "souls" asking the Home Office to give the interned Laszlo facilities for painting during his internment. The petition has not yet been presented, as Sir George Cave is said to adopt such an uncompromising attitude on this matter.

The fact that Laszlo shares a room in Holloway with another occupant, it is claimed, makes him feel unable to give vent to his artistic yearnings. If he obtained the facilities he desires he would be given a room to himself in order to indulge in Art.

In fact he would be treated as a privileged person, with the result that an interned musician would probably claim a piano in a room to himself.

An interned cook might require his own kitchen with a few joints to practise on, and so on.
